

Mono

The 'Mono' is our monopitch (asymmetric) curved roof variant - this is where one side is higher than the other, the standard configuration for canopies located against building elevations. Widths of 6000mm are easily achieved and wider still with additional design features.

Exact specification will be project specific, please check your quotation.

Mono

The 'Mono' is our monopitch (asymmetric) curved roof variant - this is where one side is higher than the other, the standard configuration for canopies located against building elevations. Widths of 6000mm are easily achieved and wider still with additional design features.

MATERIALS

Structure - All steel
 Roofing - Genuine polycarbonate
 Finish - Galvanised only or Dura-coat™ colour finish

DIMENSIONS

Virtually any available, most cost effective widths are: 2000mm, 3000mm, 4000mm, 5000mm, 6000mm. Standard lengths are at 700mm increments but any length is possible. Post centres are typically 4000mm (up to 5000mm). In all instances please enquire – we can accommodate nearly any situation.

OPTIONS

- Side panels with various infill options
- Clear, opal or coloured roofing
- Aluminium guttering and downpipes
- Wall brackets
- Wide span beams
- CHS uprights
- Post pads

APPEARANCE

Steelwork is finished in Dura-coat™ colour finish to any RAL colour. Aluminium gutters and downpipes are finished to match. Polycarbonate roof covering is either clear or opal as standard or coloured at extra cost. Post pads can be any colour, often contrasting with the structure.

SERVICES

A&S Landscape recommend early consultation to consider all aspects of the proposed installation. We provide free quotations and technical information at design stage with drawing files of all details which can be easily incorporated into architects' drawings. Full site surveys, CAD drawings and project management are all part of our standard service. Early technical involvement can often improve design and aesthetics and reduce cost.

BESPOKE PRODUCTS

Our ability to extensively customise our products ensures that we can meet any special requirements that you may have. Our flexible modular system often allows this to be done very economically whilst retaining the performance characteristics of our system.

St Cuthbert's School

St Cuthbert's Catholic Primary School is a modern voluntary aided Roman Catholic Primary School in the Norley Hall area of Wigan. Succeeding where others had failed, A&S Landscape are proud to have satisfied the school's brief for an aesthetically pleasing large secure covered area.

Working with well respected Architects E C Harris we were pleased to be able to offer our design expertise early in the planning stage providing several alternatives including photo realistic visualisation and cost options for the client's perusal.

The final design is a statement in itself with the curved roof sweeping up from the school to create a feeling of space within the area.

Based on our standard Motiva design and with additional design features the canopy benefits from 2 No 5.2 metre roller shutter doors giving the area the added value of 24/7 security. We were pleased to work with the main contractor assisting with foundation detail and setting out and working to tight timescales. The project was successfully delivered in time for the new school term.

Yew Tree School

Yew Tree Primary School based in Walsall in the West Midlands provides an outstanding learning environment for over 500 pupils for children between 3 and 11 years old.

The site manager was delighted to find a company he could entrust with this important project and pleased with a very competitive combined cost for the 5 canopies. The ageing part of the school has been greatly enhanced with the addition of the canopies, all fitted by our own DBS checked staff.

Rubber surfacing and play equipment has completed the scheme providing excellent covered activity areas for the pupils of this progressive school.
