

## Cantilever

The 'Cantilever' is a further Motiva variant; often Mono in design but it can be Duo, Linear or Wave. Back, front or central upright options make this particularly useful for play areas and walkways and also where doors or other obstructions restrict upright locations.

Exact specification will be project specific, please check your quotation.

### MATERIALS

Structure - All steel  
 Roofing - Genuine polycarbonate  
 Finish - Galvanised only or Dura-coat™ colour finish

### DIMENSIONS

Virtually any available, most cost effective total widths are: 2000mm, 3000mm, 4000mm - Standard lengths are at 700mm increments. Post centres are typically 4000mm (up to 5000mm). In all instances please enquire – we can accommodate nearly any situation.

### OPTIONS

- Side panels with various infill options
- Clear, opal and coloured roofing
- Aluminium guttering and downpipes
- Wall brackets
- Wide span beams
- CHS uprights
- Post pads

### APPEARANCE

Steelwork is finished in Dura-coat™ colour finish to any RAL colour. Aluminium gutters and downpipes are finished to match. Polycarbonate roof covering is either clear or opal as standard or coloured at extra cost. Post pads can be any colour, often contrasting with the structure.

### SERVICES

A&S Landscape recommend early consultation to consider all aspects of the proposed installation. We provide free quotations and technical information at design stage with drawing files of all details which can be easily incorporated into architects' drawings. Full site surveys, CAD drawings and project management are all part of our standard service. Early technical involvement can generally provide a better solution.

### BESPOKE PRODUCTS

Our ability to extensively customise our products ensures that we can meet any special requirements that you may have. Our flexible modular system often allows this to be done very economically whilst retaining the performance characteristics of our system.

## Ysgol Bro Alun

A new school has opened in Wrexham. The community primary school for 3 to 11-year-olds is located on Delamere Avenue and will be known as Ysgol Bro Alun after its naming in February.

The long-awaited new school was proposed for Gwersyllt in January 2012. In May 2012 Welsh Government education minister Leighton Andrews gave the go-ahead for the £5.9m school with the government paying £4.1m towards the costs of its construction. Planning permission was granted in June 2012 after it was agreed a new Welsh medium school was needed to ease over-crowding. Building work on the new school by contractors Harry Fairclough began in July 2012 and completed in September 2013.

The new school will share a headteacher and governing body with Ysgol Plas Coch, seeing Osian Jones take the helm. Mr Jones said: "It's very exciting, the parents have been here for an open day and are very impressed - The facilities are second to none."

Each classroom of the school has direct access to external covered play and learning areas, which means pupils can go out come rain or shine. A&S Landscape were engaged by the local authority to design canopies for the school and taking in to consideration many factors and preferences designed 6 canopies based on the Motiva Cantilever range

using Auto Cad, Solid Works and Google sketch up models to ensure the scheme would look and function as proposed.

Employed by leading builder Harry Fairclough, A&S Landscape manufactured, supplied and installed the canopies boasting unbreakable polycarbonate, aluminium guttering, galvanised and PPC steel frames on time, in budget.
